

**Models RV1000-HP & RV1001-HP Performance Curves:**  
**Discharge Flow Rate ( $Q_d$ ) vs. Inlet Pressure ( $P_{in}$ )** ( $75 \leq P_{set} \leq 200$ )  
 Test Conditions: Water @ 70°F; discharge to atmosphere (0 PSIG)

**Note:** Typical performance curves at the specified conditions are shown above, plotted to an **Absolute Over-Pressure** of 35 PSI (2.4 bar).
