

Models RV1000 & RV1001 Performance Curves:
Discharge Flow Rate (Q_d) vs. Inlet Pressure (P_{in}) ($50 \leq P_{set} \leq 135$)
 Test Conditions: Water @ 70°F; discharge to atmosphere (0 PSIG)

Note: Typical performance curves at the specified conditions are shown above, plotted to an **Absolute Over-Pressure** of 35 PSI (2.4 bar).
